

Level	Intermediate to advanced
Type	Individual or Group Assignment (1 to 4 people)
Topic	Lip Syncing
Points	100 points
Media	Two Minute DVD Video
Objective	The students will film a musical number lip syncing the number, matching their lips to the lyrics of a song in the editing process.
Directions	<p>Students will select a musical number, television clip, or a movie clip to lip sync to in a video format. Students are encouraged to pick a classic song or classic movie or television clip, one in which the lyrics can be understood. Must have teacher's approval on the selection. For example, a student might opt to select a <i>Beach Boy</i> number, and then act out the song in numerous locations, matching their lips to the lyrics in the video. It is important to have some type of interpretation in the video. In other words, what is the message of the song and is that message present in the video? Acting out a movie or television clip can take on numerous new meanings by the change in location and actors.</p> <p>This assignment is more difficult than it appears on the surface; a great deal of time and energy should go in to selecting the number and then thinking about how to interpret the message of the song. Also, the editing process is time consuming.</p>
