

Level	Advanced
Type	Individual or group project
Topic	Silent Movie
Points	100 points
Media	1 to 3 minute media presentation
Objective	Making use of a digital camera to create a silent movie. It is strongly recommended that students view at least one silent movie prior to attempting this assignment.
Directions	Follow silent movie genre and complete a silent movie. Your silent movie should begin with an approved script. Make use of the hero and villain storytelling that is present in most silent movies. Dialogue should be revealed on title cards, and the overall presentation should be accompanied by a sound track without words. Movie scores and soundtracks are a great source for the musical accompaniment. The image should be tinted with sepia color, as all silent movies prior to 1927 appeared. Sepia tint is an option on your camera and on the digital editing bench. It is expected that you demonstrate many of the camera techniques that you have learned in this class in your final project.
Format	Media display, YouTube postings, or DVD.
